

Dear Families,

the Municipality of Milan and AMAT (Environment and Territory Mobility Agency of the Municipality of Milan) have entrusted the coordination of the **Walking Bus** project to **Legambiente** and **ABCittà** in collaboration with **Poliedra - Politecnico di Milano**, in order to **design, manage and activate the Walking Bus service** in some primary schools of the Municipality of Milan.

The Walking Bus is **a form of school transport** for primary school pupils who are accompanied on foot to school by volunteer parents through an established route, along which the children, at the various stops arranged along the way, gather, according to a fixed schedule. Along the way, approved by the Local Police from the safety point of view, children can chat with their classmates, respecting the environment and having an experience that makes them more independent.

During the project, children and families who want to participate in the project will be involved in participatory activities on issues relating to mobility, safety, but also to responsible behaviour and in the various contexts of intervention.

We invite you to fill in the questionnaire at the following link: <https://forms.gle/JbnvtF7fjxPcsVy5> in which various information will be requested regarding the travel habits of your children to go to school.

The survey is preliminary to join the Walking Bus. Filling out the questionnaire is very important to personally help make our school more sustainable and careful to the needs of boys and girls.

It will be mandatory to read the information for the processing of personal data and Privacy.

We are waiting for you!

The staff of "Walking Bus Milano"
